Health Unit Launches New Design for Website

The Health Unit website, www.healthunit.org, has been redesigned to assist you in your search for healthy solutions.

Finding good quality health information on the internet can be overwhelming. With almost one thousand pages of credible health information, the Leeds, Grenville and Lanark District Health Unit's website can help you find information on a wide variety of health topics.

This fresh new look has been designed with the user in mind, making the Health Unit's website quick and easy to navigate. With a professional webmaster on staff, this website is constantly monitored and maintained to keep information as current as possible.

Take charge. Visit healthunit.org online and choose your solutions to enhance, promote and protect your health. Keep up to date on important issues by bookmarking the home page.

No access to the web? Use an internet station at your local library. The Health Unit's Health ACTION Line is also a way to get credible health information, call 1-800-660-5853.
